

Bless Children Home

Improve the security of *Bless Children Home*

Bless Children Home :

BLESS has started an Orphan Children's Home in its Reddichavady Campus to take care of the 2004 Tsunami affected children in Cuddalore district.

The home, which was started with 15 children now hosts around 75 children.

The children are being taken care of with good dormitory accommodation, nutritious food, supplementary education, counseling, recreation and sports facilities, yoga, dance, song recital and personality development.

What's more, great care has been taken for better personal hygiene with water and sanitation knowledge strengthening. The children from the tribal and vulnerable families are able to enjoy the natural surroundings with cattle, goat, poultry, Turkey birds etc. They also participate in the gardening activities in the weekends.

In the medium to long term, this project should enhance a significant uplift and a gain of awareness, which will last for the future generations.

Thanks to this project, around 75 children get not only the possibility to dream but are also given the chances to realize those dreams.

A wall to protect those dreams :

The old compound wall structure had been uprooted by the Cyclone Thane in 2012. The fencing with locally available materials like bamboo sticks and frames was unable to withstand the onslaught of the heavy winds and rains and intrusion of stray cattle.

The Government of Tamil Nadu after an incidence of sexual abuse of children at a home in Tamil Nadu had promulgated strict rules to be adhered by the children homes. Every children home has to get certificates from the Revenue, PWD, Fire and Health Departments for the facilities available at the home. The stability of the buildings including the compound wall is a must for the certificates and hence the construction of the compound wall for the overall protection of the home is necessary. The Revenue Authorities had directed BLESS to construct the wall at the earliest, but its cost exceeds INR 1.200.00/- (16.000€).

That is why we launch an appeal for generous people to help us finding the money to build the wall. Everyone can help according to its affordability and any contribution will be even more useful than you can imagine. Please contact us if you want to support us.

Thank you in advance for your time and generosity to the children.
